Home Computers

Officeworks now also offers its first-class services to home computer customers within the local area. Whether you have a slow computer, are in need of upgrades, having difficulty with your Internet connection, or can't seem to rid your computer of viruses, spyware, or malware, Officeworks is pleased to offer its services to you.

Established in 1991, Officeworks provides products and services to support the computing and networking needs of its small- to medium-sized business customers.

Officeworks offers a broad spectrum of hardware and software to optimize your computing and networking environment. Whether it's a new desktop for your office or a hand-held solution for your mobile workforce, Officeworks takes the guesswork out of hardware purchases. Our certified technicians have extensive product knowledge and hands-on experience with the latest, state-of-the-art computer technology.

As a certified Microsoft Partner, Officeworks specializes in the Windows operating environment and networking infrastructure and we use VMware as the virtualization platform of choice.

At Officeworks, we strive for world-class service and will deliver throughout the lifecycle of your technology investment. Whether it's a PC in need of repairs or upgrades, the integration of a new file server, or implementing Internet services, the Officeworks team of IT Professionals is ready to accept your technology assignment.
